

DOWNTIME SOLUTION

With Built-in Form Designer

PROCESS 24/7 is an off-the-shelf Windows-based software solution for downtime patient admittance administration. The built-in Virtual Form Designer gives hospital IT's the ability to quickly create the desired print formats for their patient wristbands and labels. Patient data is encrypted and is only accessible under administrators password control which can then be securely exported to the hospital's HIS via Excel file format.

- Automatic Data Encryption
- Import and Export to Excel
- Supports Multiple Forms
- Secure Administrator Control

PROCESS 24/7 supports Zebra and Zebra compatible printers by utilizing Direct Print Technology (no Windows drivers are required).

DATA ENTRY WINDOW

- Automatic Data Encryption
